Experience

- **Cognizant** July 2025 – Present
  Programmer Analyst *Hyderabad, India*
  - **System Monitoring & Reliability**: Maintained enterprise system reliability by monitoring production dashboards and application logs, actively handling alerts and ensuring 100% compliance with established SLAs.
  - **Incident Management**: Resolved cross-functional technical incidents and fulfilled support tickets utilizing PHP and SharePoint, streamlining daily operations through strict adherence to Standard Operating Procedures (SOPs).
  - **Cross-Functional Collaboration**: Shadowed and collaborated with senior engineering teams to troubleshoot complex incidents, gaining hands-on exposure to large-scale application workflows and incident management life cycles.

Projects

- **OmniCart – Distributed E-Commerce Backend**
  Java, Spring Boot, Spring Security, Hibernate, MySQL
  - **API & Architecture**: Designed a scalable order processing microservice handling over 5,000 concurrent mock transactions with 99.9% uptime.
  - **Data Persistence**: Integrated MySQL with Spring Data JPA for seamless data persistence, establishing optimized One-to-Many entity relationships that improved data retrieval speeds by 30%.
  - **Security**: Secured REST endpoints via Spring Security and JWT, successfully mitigating unauthorized access risks and ensuring data integrity.
- **StreamNet – Netflix Clone Web Interface**
  HTML, CSS, JavaScript, Bootstrap, TMDB API
  - **Frontend Engineering**: Developed a highly responsive web interface replicating the core Netflix video streaming UI/UX using HTML, CSS, and modern JavaScript.
  - **API Integration**: Integrated the TMDB REST API to asynchronously fetch and render dynamic multimedia content, decreasing DOM load time by 40% via optimized promise chaining.
- **TaskMaster – Task Scheduling Engine**
  Java, Spring MVC, JPA, MySQL
  - **Concurrency**: Engineered a multi-threaded task management backend in Java, increasing background job processing throughput by 3x.
  - **MVC Design**: Implemented the MVC design pattern to cleanly separate business logic from data routing, serving client data with sub-50ms response times.

Technical Skills

- **Languages**: Java, SQL, JavaScript, HTML, CSS
- **Frameworks / Technologies**: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Bootstrap
- **Databases**: MySQL, Relational Database Design
- **Tools & CS**: Git, GitHub, RESTful APIs, MVC Architecture, Data Structures, Algorithms, DBMS, OOP

Education

- **Kakatiya Institute of Technology and Science** 2021 – 2025
  B.Tech in Computer Science and Engineering *CGPA: 8.02/10*

Certifications & Achievements

- **Data Structures and Algorithms in Java**: NPTEL (12-week) – Scored 92%, ranked in Top 1% nationally.
- **Spring Boot 3, Spring 6 & Hibernate**: Udemy – Comprehensive training on building enterprise Java web applications.
- **Competitive Programming**: 100 Days Active Badge (LeetCode); Solved all 500-rating practice problems (CodeChef).
